RESEARCH EXPERIENCE

2019—Present	School of Biological Sciences, Washington State University Doctoral Research, Advisor: Dr. Andrew Storfer <ul style="list-style-type: none">Population genomics of the Tasmanian devil (<i>Sarcophilus harrisii</i>)
--------------	--

- Landscape genomics of the streamside salamander (*Ambystoma barbouri*)
 - Leveraged geographic information systems (GIS) data and reduced representation sequencing data to test for genetic-environment associations and identify candidate genes underlying local adaptation.

2017—2019

Department of Biology, University of Iowa

Undergraduate Honors Research, Advisor: Dr. Andrew Forbes

- Investigation of reproductive trait evolution in fly genus *Strauzia*
 - Quantified trait values for sexually dimorphic characters
 - Compared patterns of trait divergence among host-sharing species and non-host-sharing species
- Investigation of the thermal melanism hypothesis in three temporally isolated *Strauzia* species
 - Quantified thermal properties of differentially pigmented *Strauzia* species
 - Tested for differences in fitness proxies at cold temperatures among differentially pigmented *Strauzia* species
